

A minimalist approach to entropic approximations of optimal transport problems

Camilla BRIZZI, Technische Universität München, Department of Mathematics - München
Luigi DE PASCALE, Università di Firenze, Dipartimento di Matematica ed Informatica - Firenze
Anna KAUSAMO, Università di Firenze, Dipartimento di Matematica ed Informatica - Firenze

In this talk I will present a minimalist approach to the entropic approximations of optimal transport problems. This approach seems to allow some small generalisation, in the direction of requiring less regularity of the pointwise transport cost, From a paper in preparation.
